

Use Live Video

The Video feature enables you to transmit live video broadcasts to others in a session with the use of a video/web cam; Pre-recorded video (movie) is shared by using the Multimedia feature.

The Video window has the following components:

Steps for Using Live Video

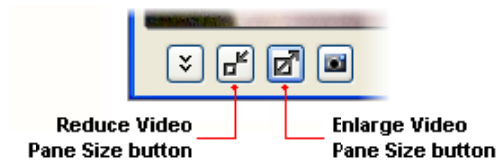

1. Click the Enable Video icon  on the menu bar.
2. Click the Show Video Window icon  on the menu bar to open the Video window.
3. Click the **Preview** button to start your camera and privately display the video images the camera is capturing.
4. Select the **Image Quality** you want to transmit. The options are Coarse Grays, Coarse Color, Medium Grays, Medium Color, Fine Grays and Fine Color.
5. Click the **Transmit** button to send the video to others in the session.

Expanding

The Video window can be expanded to reveal the Video Control panel. Click the Show Video Control Panel icon . Hide the panel by clicking the Hide Video Control Panel  icon.

Resizing

The Video pane can be resized to small (160 x 120 pixels), medium (320 x 240 pixels) and large (640 x 480 pixels).

Stop Video Transmission

To stop transmitting video:

1. But keep the Video window open; release the Transmit button by clicking on it. No images will be transmitted.
2. And close the video window; Click the  Hide Video Window button in the toolbar.
